## MOTOROLA TALKABOUT® MU350 BLUETOOTH® TWO-WAY RADIO SERIES

The Motorola MU350R series radio is bold, powerful, adventurous, devilishly charming, but most of all its arrival changes the landscape of 2-Way communications. Pair your MU radio to a BLUETOOTH® headset and communicate wirelessly. Through the use of BLUETOOTH®, your Motorola MU350 series radio allows you to cut the cord and communicate without getting tangled up. Its power is commanding as it provides users with up to twice the amount of battery life when compared to the standard NiMH rechargeable battery pack. With a 1 Watt Class D amplifier and DSP audio, this radio provides audio quality second to none. With a range of up to 35 miles\*\* and freedom to communicate wirelessly, this radio won't slow you down.

Its emergency alert feature, built-in LED flashlight and \*\*\*\*NOAA weather alert channels provide a total emergency preparedness communication solution. So escape to the great outdoors with confidence that others can be informed of any dangers that may come your way. The flashlight feature offers peace-of-mind during evening adventures or unexpected emergencies and power outages. The NOAA channels provide emergency alerts including tornadoes, winter storms, severe thunderstorms, flash floods, emergency evacuations and Amber Alerts.

## EXTENDED LIFE BATTERIES

Enjoy hours of uninterrupted outdoor activities. The MU series provide maximum battery life in a small package and is designed to withstand hours of extended usage providing users with double the talk time.

## SC AUDIO

Do you find yourself wondering what the other party said because it was just not clear? Through the use of the Switched Capacitor Filter technology the MU series provides best in class audio clarity not to be found in any other 2-way radio. Over and out!

## WEATHERPROOF

With an IP-54\*\*\* rating, the MU series flaunt its weatherproof ID design making it ideal for protection not only from dust, but from wet weather conditions, be it snow or rain splashes.

## TALKABOUT CLEAR

Boasting a high-efficiency 1 watt, class D amplifier, the MU series radio delivers enhanced sound quality by reducing distortion at high volumes.

## EXTRA POWER WHEN YOU NEED IT MOST

Push-To-Talk Power Boost, when activated, allows you to extend the transmission range by increasing the transmitter power output while saving battery life when no power boost is necessary.

## HANDS-FREE COMMUNICATION

When you are hiking up a steep mountain trail, you really need to keep your hands free to brace the rocky terrain. With iVOX acting like a speakerphone and allowing hands-free communication, you can keep on moving without stopping to answer a call.

## EASY CHARGE - 4 WAYS TO CHARGE

Designed to fit every lifestyle, the MU350 allows you the convenience of charging many distinct ways. Use the provided mini-USB charger for portable convenience, great for charging at home or to take along to recharge in a hotel. While on the go, you can use our mini-USB car charger. If you are not on the move, the desktop charger is a good option or simply use a mini-USB PC cable to charge from your PC when no power outlet is available. (Desktop Charger, Mini-USB car and PC cables are sold separately.) If none of these options are available, you can simply drop in standard alkaline batteries and you're ready to start talking.

## SILENT SIGNALS

The VibraCall™ silent vibrating ringer is especially useful for locations where ringing can be intrusive. This feature is also great when noise from a sporting event would drown out your ring tone.

## ECO SMART

The collective energy wasted in powering handheld electronics has become a global issue. Most of the energy wasted while charging a mobile device occurs within the charge. On an individual basis, the amount of energy wasted per year is negligible. However, there are hundreds of millions of chargers in use today. The large-scale incorporation of energy-efficient chargers benefits the planet both economically and environmentally. The MU series does its part by using the latest technological design to produce a high-efficiency wall adaptor which consumes one half watt of power during idle conditions.

## PRICING

MSRP for MU350R is \$149.99 per pair. (NiMH)

FOR ADDITIONAL MEDIA INFORMATION, CONTACT: COLLEEN PHILBRICK, 912-604-1950 OR PHILBRICKPR@BELLSOUTH.NET. FOR DEALER OR CONSUMER INQUIRIES, PLEASE CALL 1-800-638-5119.

\*Works with qualified BLUETOOTH® headsets from BLUETOOTH® SIG, Inc.

\*\*How far can I expect my radios to communicate? The communication range quoted is calculated under optimum conditions, with an unobstructed line of sight. Actual range will vary depending on terrain and conditions, and is often less than the maximum possible. Your actual range will be limited by several factors including, but not limited to, terrain, weather conditions, electromagnetic interference and obstructions.

\*\*\*IP-54: Dust/Splashproof from any direction.

\*\*\*\*NOAA radio service may not be available in all areas. Check with your local weather for frequency and details, or visit [www.weather.gov/nwr](http://www.weather.gov/nwr).
