- Time out timer
- Companding digital signal compression

Long Range for the Most Extreme

Motorola Talkabout® T7100 “Extended Range” Two-Way Radio Series

Designed for serious outdoor enthusiasts, the advanced Talkabout® T7100 boasts a rugged, shockproof design, as well as clear signal communication up to a 7-mile range* for those activities that demand long-range capabilities.

Durable Styling

From your first sight of the Talkabout® T7100 you will know it is designed to be a long-range radio. With an extended antenna and additional power, it will deliver extended range performance not in a burst, but for an afternoon of communication. Its sleek housing with integrated grips is easy to handle.

Power Alternatives

These radios are sold in pairs – just charge up the NiMH model or add four AA batteries and you’re ready to start talking.

Interruption-Free Communications

Full 22-frequency capacity and 38 private codes add more channel combinations to get away from the crowd. “Priority Scan” is another feature that quickly helps you catch up with others on different frequencies by finding a clear channel.

Handset Accessory Operations

The accessory connector permits use of a headset for easy operations.

Companding

The Talkabout® T7100 has a special feature—“companding”—a sophisticated digital technology that reduces the static hiss between words. This technology not only extends the effective range of the radio but also delivers noticeably clearer transmission quality.

Pricing

Manufacturer’s Suggested Retail Price is \$89.99 (AA) or \$109.99 (NiMH) per pair.
