## MOTOROLA TALKABOUT® MT350 TWO-WAY RADIO SERIES

The Motorola Talkabout® MT350 series is radical because it defies. A warrior of harsh environmental conditions, this "radical" radio is equipped to secure functionality by guarding against Mother Nature's unexpected weather tantrums. With a range of up to 35 miles\*, it is perfect for active outdoor excursions or life's everyday adventures. Take a pair on your next hunting, camping or hiking trip and stay connected no matter what the season.

## WEATHERPROOF

With an IP-54\*\* rating, the MT series flaunts its weatherproof ID design making it ideal for protection not only from dust, but from wet weather conditions be it snow or rain splashes. Its emergency alert feature, built-in LED flashlight and \*\*\*NOAA weather alert channels provide a total emergency preparedness communication solution. So escape to the great outdoors with confidence that others can be informed of any dangers that may come your way. The flashlight feature offers peace-of-mind during evening adventures or unexpected emergencies and power outages. The NOAA channels provide emergency alerts including tornadoes, winter storms, severe thunderstorms, flash floods, emergency evacuations and Amber Alerts.

## TALKABOUT CLEAR

Boasting a high efficiency class D amplifier, the MT series radio delivers enhanced sound quality by reducing distortion at high volumes.

## EXTRA POWER WHEN YOU NEED IT MOST

Push-To-Talk Power Boost, when activated, allows you to extend the transmission range by increasing the transmitter power output while saving battery life when no power boost is necessary.

## HANDS-FREE COMMUNICATION

When you are hiking up a steep mountain trail, you really need to keep your hands free to brace the rocky terrain. With iVOX acting like a speakerphone and allowing hands-free communication, you can keep on moving without stopping to answer a call.

## EASY CHARGE

Designed to fit every lifestyle, the MT350 allows you the convenience of charging many distinct ways. Use the provided mini-USB charger for portable convenience, great for charging at home or to take along to recharge in a hotel. While on the go, you can use our mini-USB car charger. If you are not on the move, the desktop charger is a good option or simply use a mini-USB PC cable to charge from your PC when no power outlet is available. (Desktop Charger, Mini-USB car and PC cables are sold separately.) If none of these options are available, you can simply drop in standard alkaline batteries and you're ready to start talking.

## SILENT SIGNALS

The VibraCall™ silent vibrating ringer is especially useful for locations where ringing can be intrusive. This feature is also great when noise from a sporting event would drown out your ring tone.

## ECO SMART

The collective energy wasted in powering handheld electronics has become a Global issue. Most of the energy wasted while charging a mobile device occurs within the charge. On an individual basis, the amount of energy wasted per year is negligible. However, there are hundreds of millions of chargers in use today. The large-scale incorporation of energy efficient chargers benefits the planet both economically and environmentally. The MT series does its part by using the latest technological design to produce a high efficiency wall adaptor which consumes one half watt of power during idle conditions.

## PRICING

MSRP for MT350R is \$89.99 per pair. (NiMH)

\*How far can I expect my radios to communicate? The communication range quoted is calculated under optimum conditions, with an unobstructed line of sight. Actual range will vary depending on terrain and conditions, and is often less than the maximum possible. Your actual range will be limited by several factors including, but not limited to, terrain, weather conditions, electromagnetic interference and obstructions.

\*\*IP-54: Dust protected and Splash-proof from any direction.

\*\*\*NOAA radio service may not be available in all areas. Check with your local weather for frequency and details, or visit [www.weather.gov/nwr](http://www.weather.gov/nwr).
