

# **S**Cobra®

VOL BAR OFF . IS

# ULTRA-HIGH PERFORMANCE RADAR/LASER DETECTOR

**Ultra Compact Design & Improved Range** Ultra-high performance with a refined style.

**Digiview™ Data Display** Detected bands easily identified in text display.

LaserEye<sup>®</sup> Provides 360° detection of laser signals.

**Digital Signal Strength Meter** Provides the user with relative proximity to the target.

**POP Mode Detection** Detects the latest Radar Gun POP (Super-fast, Instant-on) mode.

VoiceAlert<sup>™</sup> Provides user with audio band identification.

### **Cobra's New SPX Series Radar/Laser Detectors**

The new SPX Series is the culmination of Cobra's over 30 years of experience in building quality, high-performance, radar/laser detectors. The SPX Series combines following cutting-edge technology to achieve its supercharged performance - nearly doubling the detection range of its predecessors:

- · Ultra-low-noise, signal amplifiers that once were affordable only to military systems
- · Low-microwave-loss circuitry utilizing gold-plated circuit boards
- Use of flip-chip Mixer/Multiplier diodes in packages that were once unattainable
- · First Local Oscillator Transistor (Super-low-noise, high-mobility J-FET) that has been chosen to
- optimize signal gain, output power, and low noise characteristics over its frequency range
- Powerful CPU that enables sweeping of the entire police radar band spectrum in less than 240 milliseconds

The SPX Series utilizes best components/technology available today to provide best detection range in its class, against all current radar/laser speed enforcement guns used today, including Instant-on, X-band, K-band, Superwide Ka-band, and Laser. The result is a radar/laser detector that performs near the theoretical limits for a low-noise receiver.

Drive with a Cobra and drive with peace-of-mind!

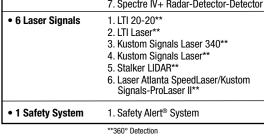

Features	Benefits			
Xtreme Range Superheterodyne® Technology	Super-fast sweep circuitry provides extra detection range and the best possible advanced warning to even the fastest radar guns.			
Pop Mode Radar Gun Detection	Detects the latest Radar Gun Pop (Super-fast Instant-On) Mode.			
IntelliMute®	Relative speed sensing auto-mute system that virtually eliminates false alerts.			
Voice Alert™	Provides the user with specific band voice annunciation.			
LaserEye®	Provides 360° detection of laser signals.			
Safety Alert®	Warns driver of emergency vehicles and road hazards from systems equipped with Safety Alert® transmitters.			
VG-2 Alert®	Alerts the user when they are under surveillance of VG-2 radar detector-detectors.			
VG-2 Undetectable	Provides complete immunity to VG-2 radar detector-detectors.			
Spectre Alert™	Alerts user when they are under surveillance of Spectre I/IV+ radar detector-detectors.			
Spectre Undetectable	Provides complete immunity to Spectre I radar detector-detectors.			
Digiview™ Data Display	Provides easily recognizable digital text display.			
City/Highway Modes	Allows the user to select operating mode, reducing the frequency of falsing in densely populated urban areas.			
Digital Signal Strength Meter	Provides the user with relative proximity to the target.			
Additional Features:				
Auto Mute	Automatically mutes the alert tone for enhanced driver convenience.			
Dim Mode	Allows the user to dim the radar detector display enhancing night driving visibility.			
Stay Set Electronic Memory	Electronically remembers radar detector settings for an indefinite period of time even with the power removed.			
System Self Test	Notifies the user that the radar detector has correctly completed a self-test and is ready.			
Ku Band Detection	Detects Ku Band Radar Gun currently being used in Europe. Be ready when it comes to U.S.			
IntelliMute® Pro	Relative speed sensing auto shutdown feature will render your detector undetectable by currently available radar detector-detectors.			

### Unit Specifications - General
