Cobra's New SPX Series Radar/Laser Detectors

The new SPX Series is the culmination of Cobra's over 30 years of experience in building quality, high-performance, radar/laser detectors. The SPX Series combines following cutting-edge technology to achieve its supercharged performance – nearly doubling the detection range of its predecessors:

- Ultra-low-noise, signal amplifiers that once were affordable only to military systems
- Low-microwave-loss circuitry utilizing gold-plated circuit boards
- Use of flip-chip Mixer/Multiplier diodes in packages that were once unattainable
- First Local Oscillator Transistor (Super-low-noise, high-mobility J-FET) that has been chosen to optimize signal gain, output power, and low noise characteristics over its frequency range
- Powerful CPU that enables sweeping of the entire police radar band spectrum in less than 240 milliseconds

The SPX Series utilizes best components/technology available today to provide best detection range in its class, against all current radar/laser speed enforcement guns used today, including Instant-on, X-band, K-band, Superwide Ka-band, and Laser. The result is a radar/laser detector that performs near the theoretical limits for a low-noise receiver.

Drive with a Cobra and drive with peace-of-mind!
